Education

Koç University — Istanbul, Turkey
M.Sc. in Computer Science and Engineering, GPA: 3.92/4.00 — *October 2024 – September 2026*
Advisor: Prof. Metin Sezgin, Prof. Yücel Yemez, Prof. Engin Erzin

Research Focus: EEG-based cybersickness in immersive VR; Deep RL for affective computing on social robots

Marmara University — Istanbul, Turkey
B.Sc. in Electrical and Electronic Engineering, GPA: 3.33/4.00 (Honor, Ranked 5th) — *September 2021 – June 2024*
Advisor: Prof. Engin Maşazade

Research Focus: Reinforcement Learning

Experience

Fair Analytics — Istanbul, Turkey
Senior AI Scientist — *September 2026 – October 2026*

- Led the establishment of AI infrastructure, including architecture, LLM tooling, AI safety, and engineering standards.
- Designed data pipelines and deployed analytics dashboards to support business intelligence and decision-making.
- Developed ML models for predictive analytics and customer insights, establishing evaluation and validation workflows.

KUIS AI Center, Koç University — Istanbul, Turkey
AI Researcher, IUI Lab & MVGL Lab — *October 2024 – September 2026*

- Conducting research on EEG-based cybersickness detection and early prediction in immersive VR using time series modeling and computer vision. **Published at ICME 2026, SIU 2025.**
- Leading a 50-participant multimodal data collection study to establish the first open benchmark for cybersickness research, supported by European CHIST-ERA GENESIS (CHIST-ERA-20-BCI-003) and TÜBİTAK Project No. 221N367.
- Conducting research on deep reinforcement learning and affective computing for autonomous facial expression discovery on social robots. **Under review at a top ML venue.**
- Designed and implemented **Wrap-Up!**, an AI-powered collaborative meeting visualization tool: a full-stack Chrome extension for Google Meet that transcribes live audio (STT), orchestrates an LLM to extract meeting structure, and renders a shared real-time canvas with proactive AI facilitation and thread tracking.

Baykon Industrial Weighing Systems — Istanbul, Turkey
AI Engineer — *February 2024 – October 2024*

- Led and completed the TUBITAK–1501 industrial AI project, developing adaptive RL control policies (Monte Carlo, TD, Q-learning, MAB) to learn the coarse-to-fine feed switching point for industrial filling.
- Collected a 1,000-run filling dataset and deployed the learned policy on an embedded filling machine over Modbus/TCP, matching the operating point of the manually tuned PID baseline. **Published at SIU 2025, ASYU 2026.**

Marmara University — Istanbul, Turkey
Undergraduate AI Researcher — *December 2022 – June 2024*

- Conducted research on reinforcement learning for industrial filling process control, formulating the MDP framework and optimizing feed switching policy using Monte Carlo methods. **Published at ICECS 2023.**

TUBITAK — Istanbul, Turkey
Engineer Intern — *August 2023 – September 2023*

- Developed a continuous-time TCP/IP communication application using C# and a data extraction tool using Python.

Open Business Software Solutions (OBSS) — Istanbul, Turkey
Software Engineer Intern — *July 2023 – August 2023*

- Developed a full-stack enterprise-level Human Resources Job Postings and Applications Management System web application using Java, Spring Boot for backend and ReactJS, MUI for frontend.
- Used LDAP and LinkedIn API with Spring Security and JWT for authentication and authorization.
- Managed project with Apache Maven and utilized Hibernate, Spring Data JPA and MySQL for database.

Kalem Software Istanbul, Turkey

Software Engineer Intern *August 2022 – September 2022*

– Developed backend services for two B2B client web applications: File Organizer, a file storage and management platform, and Material Waybill Organizer, a system for materials organization, using Java, Spring Boot, Hibernate, and MySQL.

Professional Service

– **Reviewer:** IEEE ICME 2026, IEEE TMM, IEEE SIU 2026

– **Teaching Assistant:** Introduction to Computer Science and Programming; Computer Engineering Design; Communication Engineering

Research Interests

Reinforcement Learning · Time Series Modeling · Computer Vision · Affective Computing

Relevant Coursework

- Computer Vision
- Deep Learning
- Deep Unsupervised Learning
- Intelligent User Interfaces
- Medical Image Analysis
- Embodied Intelligence
- Biomedical Signal Processing
- AI in Health Sciences
- Image Processing

Skills

– **Programming Languages:** Python, C, C++, Java

– **Libraries and Frameworks:** PyTorch, NumPy, Scikit-learn, OpenCV, HuggingFace, Spring Boot, ReactJS
