Education

Koç University

Ph.D. in Computer Science and Engineering (Incoming)

Advisor: Prof. Yücel Yemez

Istanbul, Turkey

September 2026

Research Focus: Computer Vision

Koç University

M.Sc. in Computer Science and Engineering, GPA: 3.92/4.00

Advisor: Prof. Metin Sezgin, Prof. Yücel Yemez, Prof. Engin Erzin

Istanbul, Turkey

October 2024 – June 2026 (Expected)

Research Focus: EEG-based cybersickness in immersive VR; Deep RL for affective computing on social robots

Marmara University

B.Sc. in Electrical and Electronic Engineering, GPA: 3.33/4.00 (Honor, Ranked 5th)

Advisor: Prof. Engin Maşazade

Istanbul, Turkey

September 2021 – June 2024

Research Focus: Reinforcement Learning

Publications

Ö. S. Emeksiz, Y. Yemez, E. Erzin, T. M. Sezgin, “Early Prediction of Cybersickness from EEG in Immersive VR”, IEEE International Conference on Multimedia and Expo (ICME), 2026 (accepted)

Ö. S. Emeksiz, E. Erzin, Y. Yemez, T. M. Sezgin, “A Convolutional Transformer Model for EEG-Driven Cybersickness Detection in VR Experience”, IEEE 33rd Signal Processing and Communications Applications Conference (SIU), 2025

Ö. S. Emeksiz, E. Maşazade, S. Selim, “AI-Driven Optimization of the Filling Process: A Comparison of Reinforcement Learning Methods”, IEEE 33rd Signal Processing and Communications Applications Conference (SIU), 2025

Ö. S. Emeksiz, M. E. Ağcabay, E. Maşazade, S. Selim, T. Boysan, “A Reinforcement Learning Model for Industrial Filling Process Control”, IEEE 30th International Conference on Electronics, Circuits and Systems (ICECS), 2023

Research Experience

KUIS AI Center, Koç University

AI Researcher, [IUI Lab](#) & [MVGL Lab](#)

Istanbul, Turkey

October 2024 – Present

- Conducting research on EEG-based cybersickness prediction in immersive VR using time series modeling and computer vision. **Published at ICME 2026, SIU 2025.**
- Leading a multimodal EEG data collection study to establish an open benchmark for cybersickness research, addressing the lack of publicly available datasets in the field.
- Research supported by [European CHIST-ERA GENESIS](#) (CHIST-ERA-20-BCI-003) and TÜBİTAK under Project No. 221N367.
- Conducting research on deep reinforcement learning and affective computing for autonomous facial expression discovery on social robots. **Under review at a top ML venue.**
- Designed and implemented **Wrap-Up!**, an AI-powered collaborative meeting visualization tool: a full-stack Chrome extension for Google Meet that transcribes live audio (STT), orchestrates an LLM to extract meeting structure, and renders a shared real-time canvas with proactive AI facilitation and thread tracking.
- Supervised by [Prof. Metin Sezgin](#), [Prof. Yücel Yemez](#), and [Prof. Engin Erzin](#).

Marmara University

Undergraduate AI Researcher

Istanbul, Turkey

December 2022 – June 2024

- Conducted research on reinforcement learning for industrial filling process control, formulating the MDP framework and optimizing feed switching policy using Monte Carlo methods. **Published at ICECS 2023, SIU 2025.**
- Supervised by [Prof. Engin Maşazade](#).

Research Interests

Reinforcement Learning · Time Series Modeling · Computer Vision · Affective Computing

Work Experience

Baykon Industrial Weighing Systems

AI Engineer

Istanbul, Turkey

February 2024 – October 2024

- Developed adaptive RL control policies (Monte Carlo, TD, Q-learning, MAB) achieving optimal feed switching for industrial filling process.
- Collected an industrial filling dataset (1,000 filling runs) and deployed the system on an embedded filling machine.
- Led and completed the [TUBITAK-1501](#) industrial AI project.

TUBITAK

Engineer Intern

Istanbul, Turkey

August 2023 – September 2023

- Developed a continuous-time TCP/IP communication application using C# and a data extraction tool using Python.

Open Business Software Solutions (OBSS)

Software Engineer Intern

Istanbul, Turkey

July 2023 – August 2023

- Developed a full-stack enterprise-level [Human Resources Job Postings and Applications Management System](#) web application using Java, Spring Boot for backend and ReactJS, MUI for frontend.
- Used LDAP and LinkedIn API with Spring Security and JWT for authentication and authorization.
- Managed project with Apache Maven and utilized Hibernate, Spring Data JPA and MySQL for database.

Kalem Software

Software Engineer Intern

Istanbul, Turkey

August 2022 – September 2022

- Developed backend services for two B2B client web applications: [File Organizer](#), a file storage and management platform, and [Material Waybill Organizer](#), a system for materials organization, using Java and Spring Boot.
- Managed project with Apache Maven and utilized Hibernate, Spring Data JPA and MySQL for database.

Professional Service

- **Reviewer:** IEEE ICME 2026, IEEE TMM, IEEE SIU 2026
- **Teaching Assistant:** Introduction to Computer Science and Programming; Computer Engineering Design; Communication Engineering

Relevant Coursework

- | | | |
|-----------------------------------|--|---|
| • Computer Vision | • Intelligent User Interfaces | • Biomedical Signal Processing |
| • Deep Learning | • Medical Image Analysis | • AI in Health Sciences |
| • Deep Unsupervised Learning | • Embodied Intelligence | • Image Processing |

Skills

- **Programming Languages:** Python, C, C++, Java
- **Libraries and Frameworks:** PyTorch, NumPy, Scikit-learn, OpenCV, HuggingFace, Spring Boot, ReactJS
